

# CANADA INFONET

Employment Acceleration & Mentorship

**We'll help you build your career anywhere in Canada**

## Start your Career in Canada

Canada InfoNet specializes in helping internationally trained individuals, relocating in the next 12 months, find professional jobs anywhere in Canada.

Before arriving in Canada, you will be given all the tools you'll need to secure employment that utilizes your education and professional experience through our online program.

We have helped hundreds of new immigrants start their job search in every province across Canada. Some secured positions even before they arrived!

Our employment experts have helped people in:

- Management (Mid-level and Senior)
- Business, Finance and Administration
- Engineering and I.T.
- Health Science
- Construction & Architecture
- Education and Government Service

We specialize in connecting you with jobs that use your professional expertise, no matter what field or industry you work in.

## Why Canada InfoNet Works

We take the time to really get to know you. You will work one-on-one with a trained Employment Specialist to identify careers that match your education and experience. We then connect you to a professional mentor, who will give you tips and advice on your industry in Canada.

All of our mentors are Canadian professionals working in your field of expertise, and are valuable sources of information and networking opportunities.

You will also learn how to conduct a job search in Canada, and connect directly with top Canadian employers to apply for jobs.

Apply online today.
